

## PERKY PANEL QUILT KIT

This quilt uses only 3 fabrics; a main fabric (A) and 2 coordinating fabrics, B & C.  
(Approximately 20" of each fabric)

All strips are cut the entire width of the fabric. Quilt is easily made larger or smaller by changing the widths of the strips or adding additional strips.

Fabric A: 3 Strips @ 6" wide

Fabric B: 4 Strips @ 2 1/2"

2 Strips @ 4 1/2"

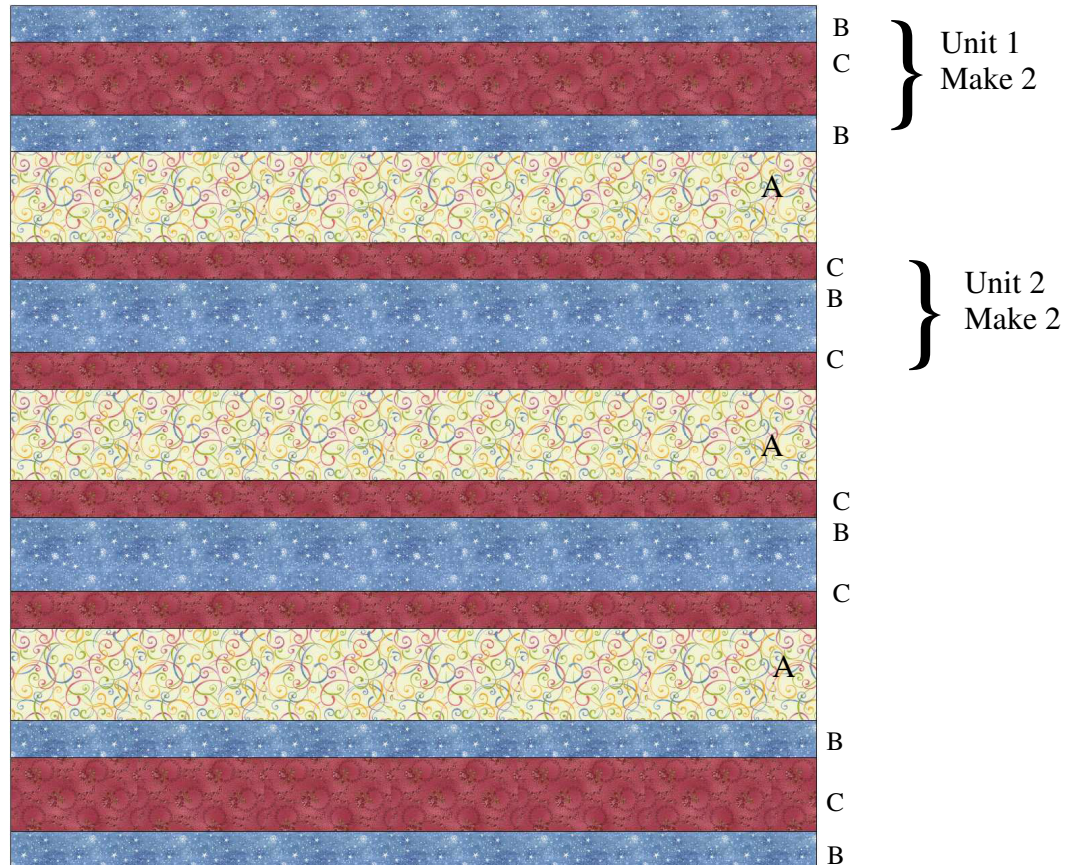

Fabric C: 4 Strips @ 2 1/2"

2 Strips @ 4 1/2"

Decide which fabric will be B and which will be C.

Follow the picture below for fabric placements. This quilt is easy to production line piece. Use a 1/4" seam throughout and press as desired. After completion and a final pressing, trim the sides of the quilt to evenly remove the selvage edges. This quilt fits nicely on one width of fabric for sandwiching and quilting on your home machine. Stitch in the ditch or consider using one of your fancy built in stitches. It is a great opportunity to practice your free motion quilting.

**Note:** The strips in your kit may vary slightly in size from those listed above. They will, however, be consistent and construction methods will remain the same.

Approximately 42 x 48
